About

The YouthLACIGF is an initiative born from the growing community of Latin American youth interested in issues related to the Internet. Given the active role that the youth have started taking, this new space is created with multi-sectoral characteristics, as a forum for debate of new ideas and perspectives to encourage the creation of lines of discussion that will be taken to other forums.

In this context, in 2016 the YouthLACIGF proposal emerged within the framework of the 9th LACIGF, which was conceived as a process that seeks to build a permanent space for exchange and discussion of new ideas and perspectives from youth.

This second edition of the YouthLACIGF sought to deepen the debate and involvement of young people in the region, bringing new issues to be discussed among participants.

The whole organizational process is conducted in a communication with the IGF Secretariat and in accordance with the main IGF criteria and established procedures, as explained below.

a. Description of the organizing process:

The YouthLACIGF community was an initiative proposed to bring a space for young people of the region from different stakeholders to discuss, from its own views, the main issues and the principal challenges they faced every day in Internet.

The agenda for this edition was defined based on the results of a public poll conducted during June, 2017. Then, main members of the initiative formed a Program Committee composed of representatives of all the stakeholders involved. This Committee was responsible for defining the agenda, the format of the discussions and logistics details.

In this year, the YouthLACIGF elaborated a Code of Conduct for the participants. The main reason was to create a safe and positive environment, in order to encourage everyone to participate and be committed to building an inclusive community. The Code of Conduct was sent to all the registered participants prior the event and published in the official site of the YouthLACIGF. It is available [here](#).

b. Description of how the multistakeholder model is maintained:

In order to create an Internet Governance Initiative that achieves the goals of openness, transparency, inclusiveness, non-commercial, and multi-stakeholder participation; the main organizers established a dialogue with other stakeholders interested in the event. At the end of June, we had the participation of 5 actors from different stakeholder groups.

In the same way, with the purpose to reflect the principal issues of the youth community in the region, we opened a process of public consultation for three weeks. In this consultation, users voted for topics of their interest or for previously proposed themes.

The Committee decided to use the formats of “Bird of Feathers” and Unconferences to maximize the participation of all attendees. The event was open to the public, free of charge and was widely disseminated in digital media.

All the sessions were streamed and recorded on the official Youtube channel, [here](#). Questions and comments were received through the comment box in Youtube and also through Twitter using the hashtag #YouthLACIGF.

A rapporteur was appointed per session, with four different rapporteurs. Reports will be available on the official YouthLACIGF website in early September.
