Dynamic Coalitions Guidelines:
Through a bottom up process DCs guideline has been modified to a comprehensive version:

Problems:
DCs initial Guideline was not very clear in terms of DCs annual report.

Suggested Solutions

1. Identification of DCs end year expected outcomes.
2. The outcomes should be a demonstration of DCs activities through-out the year;
3. The annual report should not be confused with DCs individual session report and substantive output DCs collectively produce;
4. A clear timeframe for submission of the report;

IGF 2019 Dynamic Coalitions Annual Reporting

The IGF's Dynamic Coalitions (DCs) outputs are varied and are submitted in different forms. In 2019 beside DCs substantive outputs they also contributed their activities in three formats.

Inputs to the Main Session

Ahead of the DCs Main Session at IGF 2019, 14 participating coalitions have submitted substantive papers as inputs.

**Inputs and Reports of the DCs individual slots in IGF 2019**

18 DCs submitted their individual slot reports

Annual DC Reports

15 DCs submitted their annual report. These reports include a brief of their activities throughout the year.

DCs Proposals:

16 recognized DCs submitted their proposals for individual slots during IGF 2020:

Pie chart:
- Inclusion 71%
- Trust 23%
- Data 6%
- Environment 0%

DCs Main session:

- DCs have started collaborative work on their main session for IGF 2020;
- DCs main session in 15th IGF will address COVID 19 pandemic and it's impacts on the work of the DCs;
- Ahead of the DCs main session, interested DCs will submit a substantive one page paper about how the pandemic affected their work, and the lesson learned through the Pandemic;

Thank you!
